JBIS Journal of the British Interplanetary Society

VOLUME 44 1991

INDEX

EDITORS

L.J. Carter
M.J. Fogg
R.L. Forward
A.G. Haire
R. Hall
W.I. McLaughlin
P. Norris
I.E. Smith
R.L.S. Taylor
G. Vulpetti

THEMES

New Space Concepts (Pts. II, III & IV)
Terraforming
Interstellar Studies
Marcol in Space (Pt. II) 'The Next Generation'
Soviet Astronautics
Space Astronomy
Logica in Space (Pt.III)
Rocket Propulsion
Universe Made for Man
Telespazio SpA, Earth-Oriented Activities Through Space

AUTHOR INDEX

Anderson J.L.	Space-Tethered Atmospheric Systems	103
Ashford D.M.	The Commercial Demands for Space Stations	269
Barrington-Cook J.I.	Logica's One-Way VSAT System	29
Bellaccini S. and G. Rozera	The Italsat System	447
Bellerby J.M.	Hydrazine as a Propellant for Space Systems	211
Billings T.L.	Radar Remote Sensing of Lunar Lavatubes from Earth	255
Birch P.	Supramundane Planets	169
Birch P.	Terraforming Venus Quickly	157
Black W. and Haire A.	Management of a Large Scale Data-Processing Project for Space Operations	357
Carr B.	Anthropic Principles as Constraints on Cosmological Models	63
Cenci A.	Space Techniques for Geodesy and Geodynamics	421
Ciappa A., Marullo S., Ricottilli M. and Zambianchi E.	The Use of Landsat TM in the Observation and Modelling of Circulation in The Gulf of Gaeta	461
Clark P.S.	The Soviet Photoreconnaissance Satellite Programme 1982-1990	537
Clarke C.J.S.	The Many-Worlds Interpretation of Quantum Cosmology	71
Cocks F.H.	A Deployable High Temperature Superconducting Coil (DHTSC): A Novel Concept for Producing Magnetic Shields Against Both Solar Flare and Galactic Radiation During Manned Interplanetary Missions	99
Crowson A.	Remote Station Management Using Spacecraft Control Software (The ERS-1 Prodis System)	343
Cruise A.M., *et al*	A Wide Angle Earth Albedo Sensor for Spacecraft Attitude Determinations	142
Davies P.E. and McDonald A.J.C.	Results of the HIPPARCOS In-Orbit Payload Calibration	37
Deininger W.D. and Vondra R.J.	Spacecraft and Mission Design for the SP-100 Flight Experiment	217
Diner D.J., Tubbs E.F. Gaiser S.L. and Korechoff R.P.	Infrared Imaging of Extrasolar Planets	505
Drabble B.	Spacecraft Command and Control Using Artificial Intelligence Techniques	251
Falcioni E.	Telespazio's Systems for Italsat Ground Support and TTCM/IOT & TRMS Services	439
Fogg M.J.	Terraforming, As Part of a Strategy for Interstellar Colonisation	183
Gillet S.L.	Establishment and Stabilization of Earthlike Conditions on Venus	151
Haeseler D.	Landing Spacecraft Gently on Earth - The Soviet Parachute Systems	534
Halyard R.J.	Optimum Interstellar Travel Times for Pulsed Fusion Propulsion Systems	377
Hall R.	The Soviet Cosmonaut Team	563
Hamer P.A. and Snowden P.J.	Ulysses Spacecraft Control and Monitoring System	317
Haviland R.P.	Space Station Architecture	275
Heath M.J.	Terraforming: Plate Tectonics and Long-Term Habitability	147
Holebrook S.	Long-Term Developments in the Global Telecommunications Infrastructure	243
Hoyle F. & Wickramasinghe N.C.	The Implications of Life as a Cosmic Phenomenon: The Anthropic Context	77
Hudson H.S.	A Space Parasol as a Countermeasure Against the Greenhouse Effect	139
Irving M. and Lee J.	The Risk Areas in On-Board Space System Development	9
James P.C. and Lunn D.S.	ROSAT Telecommand Scheduling	329
Klepping A.H.	Liquid Space Engine Development at Royal Ordnance Rocket Motors Division	195
Landis G.A.	Proposal for a Sun-Following Moonbase	125
Lawton A.T. and Wright P.	Searching for Other Worlds	400
Leader E.	The Recent History of Elementary Particles	87
Lebon B.A.	An Energy Storage System for Artificial Gravity in Space and Orbital Transfer	121
Leschly K., Allestad D. and Herrell L.	The Second Generation Wide-Field/Planetary Camera of the Hubble Space Telescope	477
Linick S.H. and Holberg J.B.	The Voyager Ultraviolet Spectrometers - Astrophysical Observations from the Outer Solar System	513
McCormack A. *et al*	The COMPTEL Project and Logica's Involvement	3
McMahaon D.K.	Methods of Simulating On-Board Software Based on Experiences with the ROSAT (Hardware-in-the-Loop) Simulator	297

Manca M. and D'Alessandro F.	The SAX Ground Segment Architecture and Functions	431
Mara S.	CCSDS: Implications for the UK	291
Marcolin C.	Commercial Satellite Communications	469
Matloff G.L.	Early Interstellar Precursor Solar Sail Probes	367
Mautner M.	A Space-Based Solar Screen Against Climatic Warming	135
Minovitch M.A.	Exploring the Solar System with Multiple-Launched Gravity-Propelled Miniaturised Spacecraft	589
Minovitch M.A.	Machine-Made Gravity-Propelled Interplanetary Space Stations and the Exploration of Mars	598
Mocci G.	Telespazio's Way to Space: The Space Technology Branch	415
Moshir M.	The IRAS Faint Source Survey	495
Murdin P.	Formation and Evolution of Stars and Galaxies - Anthropic Constraints	57
Nussinov M.D. and Maron V.I.	Evolutionary Approach to SETI Problems	393
O'Connor I. and Payne C.	The Mark III Front End Controller: A Monitor and Control System for Ground Stations	337
Papagiannis M.D.	Bioastronomy - The Exploration Broadens: The Third International Symposium on Bioastronomy	405
Parkinson R.C.	The Space Economy of 2050 AD	111
Powell J.W. and Richards G.R.	The Atlas E/F Launch Vehicle - An Unsung Workhorse	229
Rather J.D.G.	Lasers Revisited; Their Superior Utility for Interstellar Beacons, Communications and Travel	385
Roberts D. and Smith H.	Eutelsat II: The Birth of a New Generation	19
Rowell S.H.G.	Simulators at ESOC: Bringing Experience to Bear	347
Salter W.	Columbus Mission Planning Concept	307
Senior C.L.	Solar Heating of Common Lunar Minerals for the Production of Oxygen	579
Shallis M.	On Time - An Anthropic Conception?	51
Shayler D.J.	The Proposed USSR Salyut and US Shuttle Docking Mission c 1981	553
Sheskin T.	Allocating Power to Schedule Loads and Charge Batteries on the Space Station	263
Sims M.	Artificial Realities: A Future Space Engineering and Control Tool: A Review	257
Singer C.E. and Singer F.R.	Centrifugal Relays for Spacecraft Propulsion	127
Smets G.	DAPRES, The Archiving Challenge	13
Smid H.H.F.	Soviet Space Command and Control	525
Takayama K., Hiramatsu S. and Shiho M.	CW 100MW Microwave Power Transfer in Space	573
Tuozzi A.	The DRS Ground Segment Facilities at the Fucino Space Centre	453
Vaughan A.H.	Diagnosing the Optical State of the Hubble Space Telescope	487
Zubrin R.	Nuclear Salt Water Rockets: High Thrust at 10,000 Sec Isp	371

Subject and Acronym Index

AD	357	Big Bang	57, 63	Cosmological Models	63
